SEETHESKILLS NEWS

Standing in front of the challenge for energy-efficient construction and acting at a market level in order to stimulate the demand.

The relevance of the Integrated Repository: databases, benefits and functionalities

One of the most relevant products created within the Seetheskills project is the **Integrated repository**, a web IT solution that interrelates 3 databases:

- **EE Materials Catalogue**: Construction database for sustainable construction with data to facilitate selection through environmental indicators.

This database will be originated as a pre-selection of energy-efficient materials based on the ITeC BEDEC database of more than 900,000 articles and more than 40 years of history in the construction sector, and the ITeC Sustainable materials website.

About REBUILD

SEEtheSkills side-by-side with the EU projects

Communication actions

- Certified Professionals and Companies Database: This database will contain professionals and companies relevant to the construction sector and in particular to energy efficiency in the 5 countries of the SEETHESKILLS project consortium and can be extended to the countries of the European Community. BUS Advisor app created by ISSO was a good starting point and will be adapted for the SEEtheSkills project.

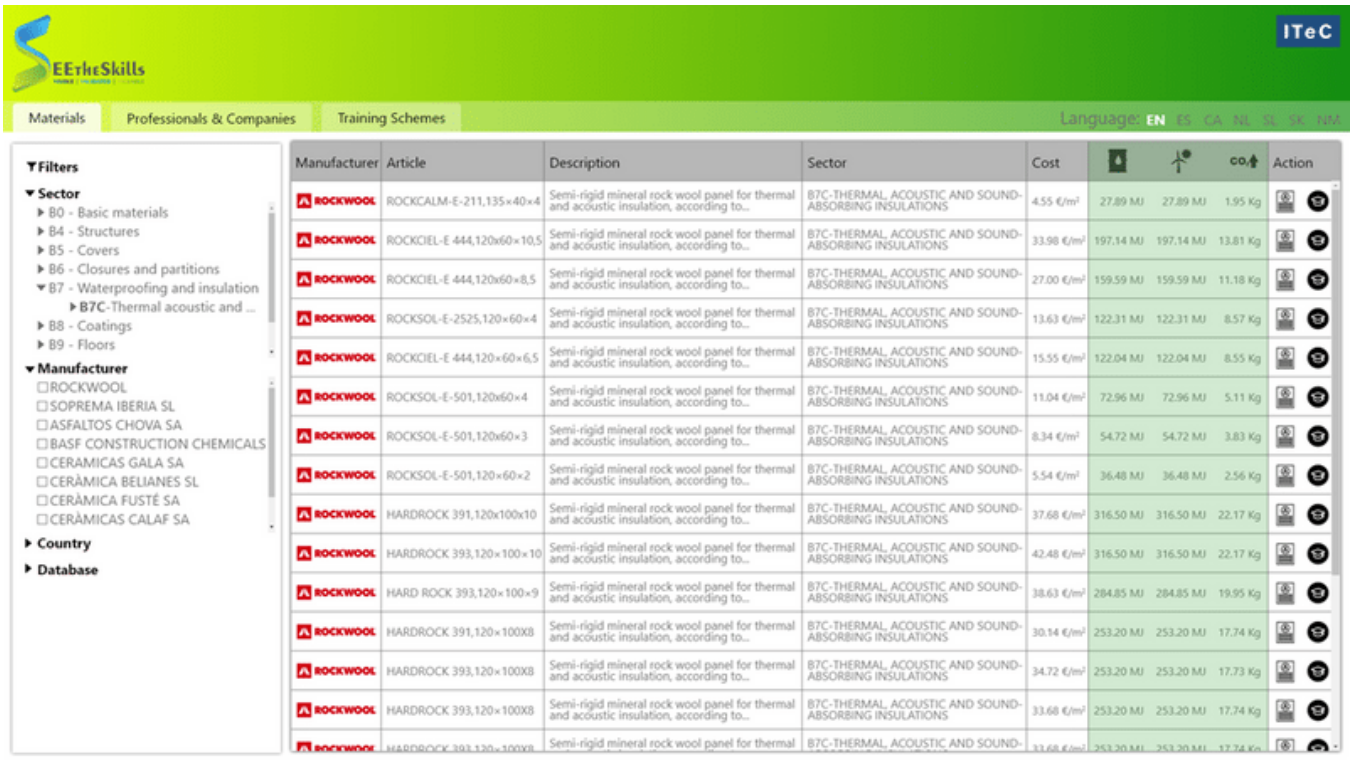
- E-learning training curricula and programmes, especially for training of professionals in the implementation of construction and renovation measures in energy-efficient buildings. This e-learning platform and database will provide construction professionals with a collection of existing and new edited e-learning materials to ensure that all professionals are equipped for a future of (near) zero energy buildings in a sustainable built environment.

What advantages could digitisation bring to the construction sector with the help of these 3 databases and the integrated repository?

- Always get information from reliable construction sector databases linked to the original databases.
- Identify the best solutions to apply in the construction sector in terms of energy efficiency, thanks to relevant information on EE materials, EE certified professionals and EE training programmes.
- Ensure the proper application of energy-efficient construction techniques by qualified professionals.
- Make visible the professionals qualified to use EE materials and the training curricula offered for their application.

Some of the key features that the Integrated repository portal will provide are the following:

- Conducting a smart search for efficient materials through the filtering system, enabling a comparison to determine which materials are more efficient in terms of energy consumption, carbon emissions and material costs.
- Locating companies that could supply these efficient materials and professionals trained to install them.
- Finding training plans to train in the installation of the selected materials.
- Finding qualified professionals to carry out the installation of the selected materials.



Integrated Repository-User interface prototype (Materials Catalogue)

14th BUS exchange meeting

Project SEEtheSkills has presented past and forthcoming activities. Check the video and get familiar with what can you expect from the project in the next months.

Forthcoming deliverables

What to expect from SEEtheSkills project in year 2023?
Here is a list of forthcoming deliverables:

Title	Due to (in months)	Responsible partner
Tasl 3.5 Webinars ready on e-learning platform	21 (28 Feb 2023)	all
D4.3 E-RPL tool	21 (28 Feb 2023)	UKIM
Task 5.1.2 "Ask the tenants" campaign for harvesting ideas conducted	21 (28 Feb 2023)	STUBA
D5.2 Promotional video "Our tenants appreciate energy skills"	21 (28 Feb 2023)	UL
D4.4 Digital leaflet "Learn through Game in SEEtheSkills"	24 (31 May 2023)	ISSO
Task 5.2 Comparing different legal obligation in partner countries	24 (31 May 2023)	SKSI
D5.3 Report on current legislation and draft national "micro" roadmaps for legislation changes for increasing demand for energy skills	24 (31 May 2023)	SKSI
D5.5 Concept of sustainable energy skills Digital badge	24 (31 May 2023)	BIM Academy
D6.2 Promotional brochures and leaflets for Integrated repository of skills and e-learning platform	24 (31 May 2023)	UKIM
D1.6 2nd short project progress report	24 (31 May 2023)	ECNM

Latest news from us

On 13 December, the 11th CM was held, focusing on a specific topic - the preparation of the 1st Interim Report. The session was opened by the project coordinator Jadranka Arizankovska, ECNM. She described the process of writing and the deadlines for preparing and submitting all parts of the interim report

After the introductory remarks, the project officer Luca Angelino, CINEA, gave general guidelines for the successful preparation of the report. The project officer was very helpful by reporting on the most common mistakes and challenges in reporting and suggesting some points to consider when preparing the report documents.

The next speech was given by the project manager Lihnida S. Georgievska, who presented the current status of the project in terms of tasks, deliverables, meetings, events, etc. that have been carried out so far. The structure of the interim report was also explained, including the responsibilities of the project partners.

After the lunch break, the 2nd working session was dedicated to the preparation of the individual financial statements. The content of the financial report was explained to the partners, as well as the procedure for filling in the financial data and the relevant documents that need to be collected for the purpose of interim reporting.

In the last part of the meeting, the next project tasks were briefly discussed and planned.

The presentation and the discussion of project team was very comprehensive, collaborative and effective.

The next project meeting was announced as an online meeting on 16 January 2023 to finally review the status of the interim report and make further adjustments.

11th consortium meeting

The 11 th CM was organized with one specific topic to be cover – preparation of the 1st Interim report. On the meeting the project officer Luca Angelino, CINEA, to share his general guidelines for successful preparation of the report.
